SUMMARY

BCA student and aspiring Data Science professional with a foundation in Python, Machine Learning, SQL, Pandas, NumPy, and Data Analysis. Experienced in developing ML-based projects such as a College Query Chatbot and currently working on an AI-Powered Resume Shortlisting System. Interested in applying data-driven and AI techniques to solve real-world problems and build practical solutions.

EDUCATION

2024-2027	Bachelor of Computer Applications(BCA) at Galgotias university	
2024	12th at Nalanda College, Bihar Sharif	67%
2022	10th at High School Gonawan Harnaut	71.4%

SKILLS

Programming languages	C, Python , Java
Framework & Web	HTML, CSS, FLASK
ML & Libraries	Numpy, Pandas, Matplotlib, Scikit-learn, ML Algorithms
Core Concepts	Data Structure and Algorithms, OOPS, DBMS, OS, CN
Databases	SQL, MySQL
Platform & Tools.	VS Code, Git/GitHub, Google Colab, Microsoft Excel

PROJECT

1. College Query chatbot 🤖

Technologies: Python, Scikit-learn (sklearn), Machine Learning, Flask, HTML, CSS

- Developed a machine learning-based chatbot to answer college admission and general college-related queries.
- Used Scikit-learn to train and implement the machine learning model for processing user queries.
- Built a web-based interface using HTML and CSS and integrated it with the Flask application.
- Connected the trained ML model with the web interface to provide relevant responses to user queries.

2. AI-Powered Resume Shortlisting System 🧠 — **In Progress**

Technologies: Python, Flask, Scikit-learn, Pandas, NumPy, NLP, SQL, HTML, CSS

- Developing a web-based AI system that analyzes candidate resumes and compares them with job descriptions and required skills.
- Using Python, Pandas and NumPy for resume data processing, cleaning and analysis.
- Applying NLP and Scikit-learn techniques to extract relevant skills, keywords and other information from resumes and calculate candidate-job matching.
- Using SQL to store and manage candidate information, extracted skills and shortlisting results.
- Building the application interface with HTML and CSS and connecting the backend through Flask.
- Designing the system to assist recruiters in resume screening and candidate shortlisting based on job requirements.

CERTIFICATION

- Database Programming with SQL — ORACLE Academy
- Advanced Excel — GREYLEARN
- Data Analysis — Simplilearn

LANGUAGE

- Hindi — Native
- English — Basic / Conversational
